

SIGNAL HAWK -240v- 33 KV Voltage Sensor:

Description

The SIGNAL HAWK Voltage Sensor is a highly-accurate high-voltage sensor. The light-weight, compact, designed Voltage Sensor can be easily attached to any place, The Helmet Mount Voltage Sensor allows users to detect high-voltage sources without using their hands, allowing more mobility during work. When the user is in the vicinity of any high-voltage source, the Voltage Sensor emits a sharp noise to warn surrounding workers. The Signal Hawk Voltage Sensor is ideal for workers dealing with electrical equipment and high-voltage equipment installations. Helmet Mount Voltage Sensor has an immediate response to voltage discharges. The Voltage Sensor operates on batteries.

Product Specifications:-

Voltage sensing Range : 240-33kv

Operating Temperature: 0 – 55 degree C

Indicator : RED and GREEN Led Indicator with alarm

Weight: 140 grams

Battery: 2 X 1.5V AAA

GENERAL

Adjustment: Push button

Brand: SIGNAL HAWK

Colour: Black

Country of Origin: India

Model: HV-33

Warranty : 1 year
